Yi-Yun, Liao

Frontend Engineer / Real-Time Platforms / Former Lead Designer

yiyun.bian.design@gmail.com +886-975498468 https://github.com/yiyun-liao/ https://www.linkedin.com/in/yiyun-liao/

Work Experience

Frontend Engineer | AmazingTalker - VCAAS

2025.08 - 2026.03

65+ merged PRs · 8 months · React · TypeScript · MobX · WebRTC / TRTC · NX monorepo

- **Broke down a PM requirement into ordered prerequisites** —e.g. screen-share-control: refactored the participant panel and ChatProvider first to establish clean state boundaries, then designed and implemented ScreenShareRequestProvider's permission-state model; aligned backend API contracts directly without PM intermediary
- Maintained reactive meeting state **with MobX (observer / reaction) across SDK stores (RTC / attend / device)** and app-layer UI — ensured consistent mute, camera, and permission behaviors through role transitions
- Implemented whiteboard toolbar enhancements and Electron screenshot features (auto-save, save-as dialog, Document PiP) across web and desktop — resolved Windows-specific rendering issues and ensured consistent behavior across environments
- Wired **WebSocket-driven SDK** events (reactions, participant state, view mode) through custom Providers and hooks to UI layer; built stream reaction system and mic-activity animation end-to-end.

Full Stack Developer / Intern | WeHelp

2025.01 - 2025.07

- Built full-stack expense splitting app (React · Next.js · FastAPI · PostgreSQL · AWS EC2) with TapPay payment, JWT auth, real-time fuzzy search, and geolocation filtering

UI/UX Designer & Designer Mentor | AmazingTalker

2022.09 - 2024.12

- Optimized shopping cart flow end-to-end with engineering — defined drop-off hypotheses, drove solution validation, **+14% purchase conversion**; established company-wide **Design Guidelines** and component library

Education

Bachelor Degree of Industrial Design | National Taiwan University of Science and Technology

2015-2019

Graduation Exhibition: MIMU No.Tent.

- Technical collaboration with BenQ and served as the conceptual **precursor to the BenQ GV50**.

Skills

Front-End Frameworks & Libraries
React 18, TypeScript, MobX, Next.js

Styling
CSS Modules, LESS, Tailwind CSS, Ant Design

RTC / Desktop
WebRTC, TRTC, Electron, ResizeObserver, NX Monorepo

Certifications
Coursera: Google Project Management

Design
Figma, Design Systems, UX Research, Responsive Design

Projects

Splitly

website github presentation

Helping users quickly split bills and track expenses with multiple splitting methods

- Built a full-stack expense splitting app featuring real-time calculators (actual, percentage, adjusted) with comprehensive state management using React Context API and client-side caching for optimal performance.
- **React**, **Next.js**, **Tailwind CSS** | **FastAPI**, **PostgreSQL**, **SQLite** | **AWS EC2**, **Vercel**, **Firebase** | **MVC** Architecture

Taipei Travel Search

website github

Helping users quickly discover Taipei's attractions and plan trips

- Developed a responsive booking platform featuring TapPay payment integration, JWT authentication, and real-time fuzzy search for Taipei attractions with geolocation-based filtering.
- **FastAPI**, **MySQL**, **JWT** | **AWS EC2**, **TapPay** | Taipei Attractions API | **MVC** Architecture

Air Quality Monitoring Station

website github

Real-time monitoring of Taiwan's air pollution index

- Created a real-time air quality monitoring dashboard with interactive data visualizations, geolocation-based station filtering, and automated Discord notifications for pollution alerts.
- **FastAPI** | **Chart.js**, **SVG Graph** | Taiwan EPA Open Data APIs, **Discord API** | **Git** Collaboration
